BE PROJECT SECOND REVIEW EVALUATION SHEET

VESIT | Department of Automation and Robotics | Academic Year 2026-27 | Semester VII | Maximum Marks 30

Guide	Gopalakrishnan Narayanan.	
Team Member	1	Mohammed Salah Altaf Chogle
	2	Aayush Sudhir Kalam
	3	Ali Kalsekar.
	4	
Project title	Advanced Safe Load Indicator.	
Students and roll numbers		**Guide and evaluator**

Criterion	Maximum	Marks awarded	Evidence and evaluator checkpoints	Reviewer notes
Progress against approved objectives and milestones	5	5	Approved objectives addressed; milestone status supported by dated evidence and reasons for deviations.	
System design and technical implementation	5	5	Architecture, interfaces, components/algorithms and implementation choices are justified and technically sound.	
Working prototype and integration	5	5	Core modules function; hardware/software integration is demonstrated reliably under relevant operating conditions.	
Testing results and validation	5	3	Defined test cases, measured results, requirement-versus-actual comparison and analysis of failures or limitations.	Validation Not Done
Technical understanding and individual contribution	5	5	Members answer technical questions, explain design ownership and identify their individual contribution.	
Documentation evidence and completion plan	5	4	Updated report, work log, code/BOM/diagrams, remaining tasks, risks and realistic final-review schedule.	
TOTAL	**30**	**0**	**Scoring scale 5 Excellent | 4 Good | 3 Satisfactory | 2 Limited | 1 Weak | 0 No evidence**
